

**REPORT OF THE INDEPENDENT AUDITORS TO THE MEMBERS OF SOCIETY OF RADIOGRAPHERS OF SOUTH AFRICA**

10 February 2006

We have audited the annual financial statements of Society of Radiographers of South Africa, set out on pages 2 to 10 for the year ended 31<sup>st</sup> December 2004. These financial statements are the responsibility of the council. Our responsibility is to express an opinion on these financial statements based on our audit.

Scope - We conducted our audit in accordance with statements of South African Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance that the financial statements are free of material misstatement. An audit includes;

- examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements;
- assessing the accounting principles used and significant estimates made by management, and
- evaluating the overall financial statement presentation.

We believe that our audit provides a reasonable basis for our opinion.

Qualification - Subscription income is based largely upon unaudited returns received from provincial societies. In common with similar organisations, it is not feasible for the society to institute accounting controls over cash collections from donations prior to the initial entry of the collections in the accounting records. Accordingly, it was impracticable for us to extend our examination beyond the receipts actually recorded.

Qualified Audit opinion - Except for the effects of any adjustments which might have been necessary had it been possible for us to extend our examination of cash collections from donations, and to audit the returns from provincial societies, in our opinion, the financial statements fairly present, in all material respects, the financial position of the society at 31<sup>st</sup> December 2004 and the results of its operations for the year then ended in accordance with generally accepted accounting practice, and in the manner required by the society.

**The 24<sup>th</sup> International Congress of Radiology 2006**

The Radiological Society of SA (RSSA) is hosting the 24<sup>th</sup> International Society of Radiology Congress from 12-16 September 2006 in Cape Town. The Society of Radiographers of SA (SORSA) has been invited to host the radiographic component on behalf of the International Society of Radiographers and Radiation Technologists (ISRRT) at ISR 2006.

**Please be advised that reduced registration fees for members of SORSA have been especially negotiated with RSSA for the congress.**

The radiographer fee structure is:

	Early Registration (before 30/6/2006)	Late Registration
SORSA members	R1000	R1200
SORSA non-members	R1500	R1650

Radiographer day registration R300

This registration fee allows access to all academic sessions, exhibitions and social activities, the same as the radiologists are entitled to for their registration fee of R3900 (early) and R4300 (late). Please note that the congress dinner is an optional extra for all delegates.

The registration fee for radiographers does not in any way limit access of a radiographer to any particular session/s. A radiographer has access to all 9 parallel tracts and is free to attend any/all sessions for all 5 days. A radiographer will be treated as any other delegate and attendance is not limited to only the ISRRT tract.

The ISRRT tract will handle primarily radiographic issues that are not necessarily academic presentations as per the attached provisional program. The other 8 tracts are broken down into the different systems, for example, musculo-skeletal, abdomen etc, where specialists in the various fields will present papers on each system.

Members of SORSA will be required to furnish proof of SORSA membership (membership no) when registering. Register on line at: [www.isr2006.co.za](http://www.isr2006.co.za)  
 Enquiries to: [isr2006@globalconf.co.za](mailto:isr2006@globalconf.co.za) or telephone 021 762 8606

I sincerely hope that radiographers will take advantage of this opportunity to attend this international congress where for the first time in South Africa the radiographers have joined forces with the radiologists. SORSA will not host a separate national congress in 2006. The RSSA has pledged their support to our next congress, the 15th ISRRT World Congress from 24-27 April 2008 at ICC in Durban.

We look forward to welcoming you to ISR 2006.
